

# Guide: Get started with IntelliCharge.AI

## Benefits of IntelliCharge.AI:

### AI-based optimisation

IntelliCharge.AI optimises charging schedules in real-time based on electricity prices, tariffs, weather forecasts, and consumption patterns. This ensures accurate and personalized plans for maximum energy savings.

### Fully automated energy management

With version 2 of IntelliCharge.AI, fully automated energy management is introduced within just 48 hours after setup, setting a new standard for quick and effective energy optimisation.

### Savings and sustainable energy

IntelliCharge.AI reduces energy costs by up to 48%, decreases CO2 emissions by up to 30%, thereby promoting sustainable energy systems and environmental protection.

### User-friendly dashboard

IntelliCharge.AI provides access to all essential information through our user-friendly dashboard, allowing users to track AI plans, energy consumption, and CO2 savings

## Guide: Get started with IntelliCharge.AI

Ensure a smooth start with IntelliCharge.AI:

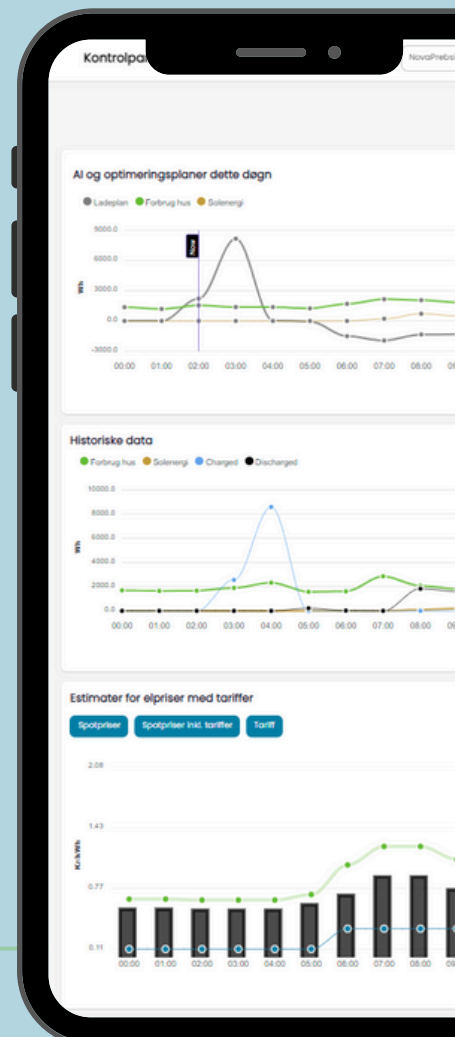

1. Create an account at the following link: [www.intellicharge.ai](http://www.intellicharge.ai) Click on 'Sign Up' (Check email inbox and click on the link to confirm user's email address).
2. Complete registration by providing the product key\*, system address, and plant information:

- Inverter model
- Inverter serial number
- Battery model
- Number of battery modules

The user now has access to IntelliCharge.AI.

\*Activation of the product key can occur during setup or later.

Use our quick guide to easily get started.

## ACCOUNT ACTIVATION

### Step 1: Begin registration

Go to [www.intellicharge.ai](http://www.intellicharge.ai) and click on 'Sign Up.'

Fill out the form with your name, email address, and choose a password.

Check the box 'Please accept Terms & Conditions and Privacy Policy' and click 'Sign Up.'"

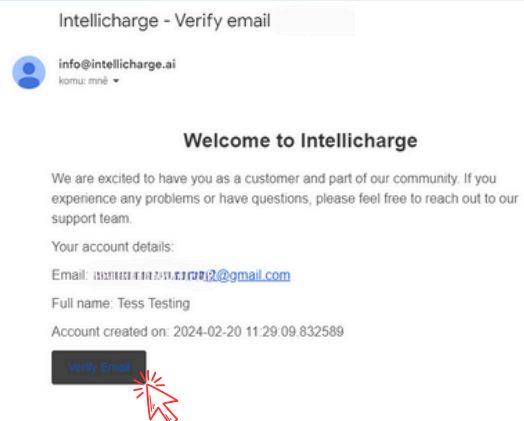

## ACCOUNT ACTIVATION

### Step 2: Verify e-mail

Check your email inbox - there should be an email from IntelliCharge.AI.

If you don't see the email, check your spam folder, or wait a few minutes.

Once you receive the email: Click the 'Verify Email' button to confirm your email address.

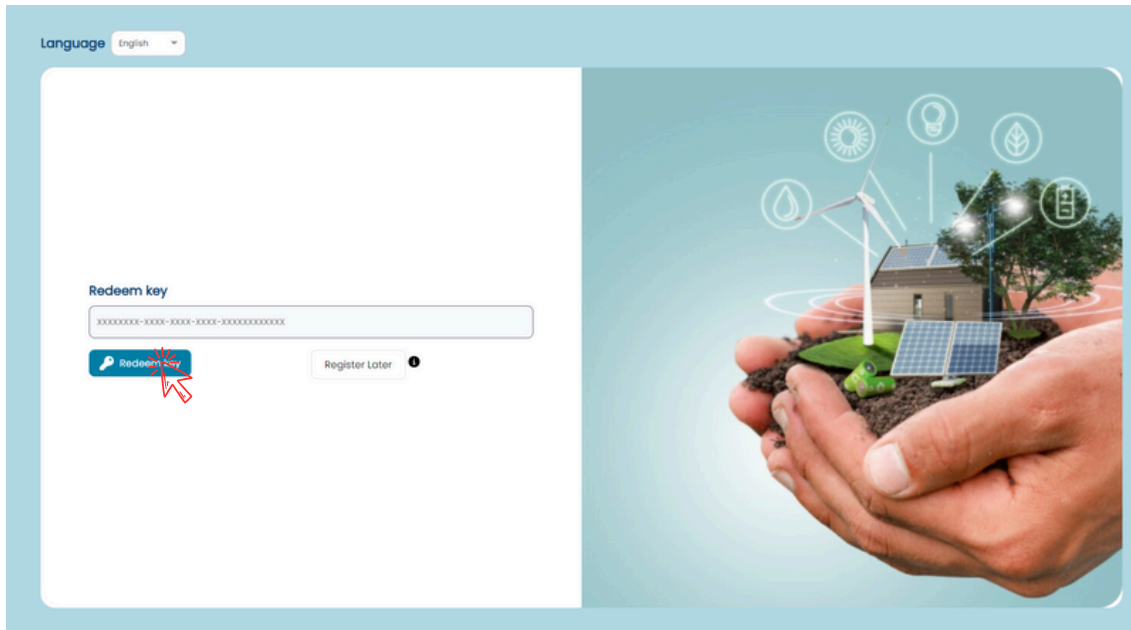

For further information, visit our website or contact us

## ACCOUNT ACTIVATION

### Step 3: Redeem product key

After validation, you will be redirected to a new page where the product key can be redeemed by pressing 'Redeem Key'.

You can skip this step by clicking on 'Register Later.'  
More information about this can be found in steps 6-9.

## ACCOUNT ACTIVATION

### Step 4: Enter installer code

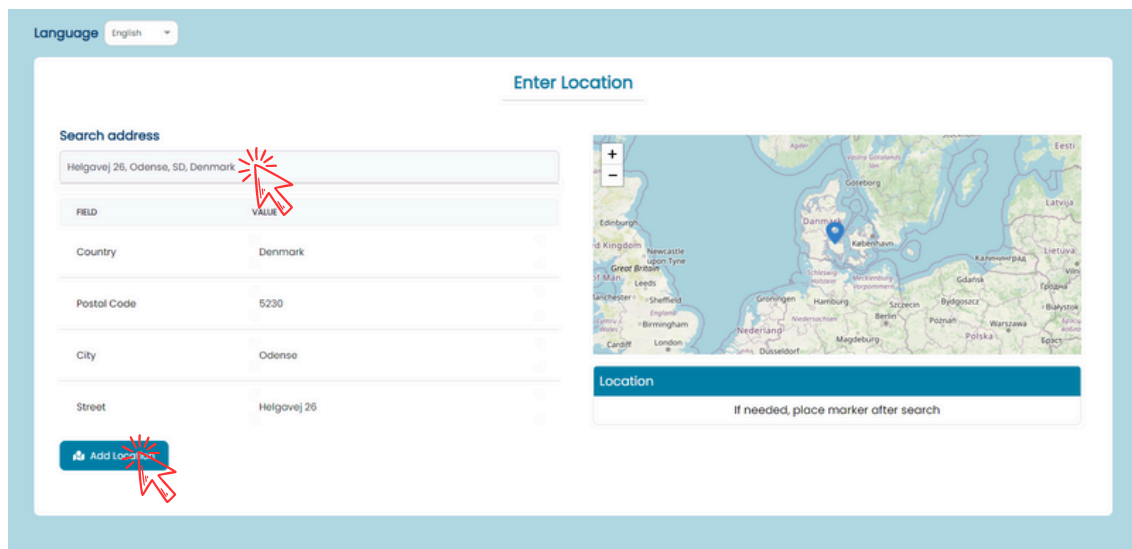

To share account access with your installer, enter their unique installer code. If you do not know the code or do not wish to share access, you can skip this step.

## ACCOUNT ACTIVATION

### Step 5: Provide the system's location

Search for the address and confirm by pressing 'Add Location'. If there are issues, click and select directly on the map.

Language English

### Enter Location

**Search address**

Helgovej 26, Odense, SD, Denmark

FIELD	VALUE
Country	Denmark
Postal Code	5230
City	Odense
Street	Helgovej 26

**Add Location**

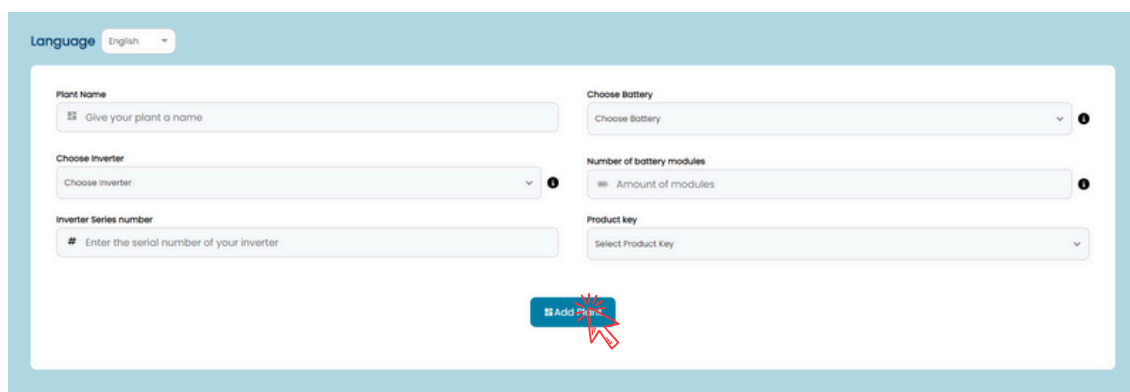

**Location**

If needed, place marker after search

## ACCOUNT ACTIVATION

### Step 6: Enter plant information

Fill out the form and confirm by pressing 'Add.'

Language English

**Plant Name**

Give your plant a name

**Choose Inverter**

Choose Inverter

**Inverter Series number**

Enter the serial number of your inverter

**Choose Battery**

Choose Battery

**Number of battery modules**

Amount of modules

**Product key**

Select Product Key

**Add Plant**

For further information, visit our website or contact us

# IntelliCharge.AI

## About the inverter serial number:

Make sure to use uppercase letters - such as LM instead of lm.

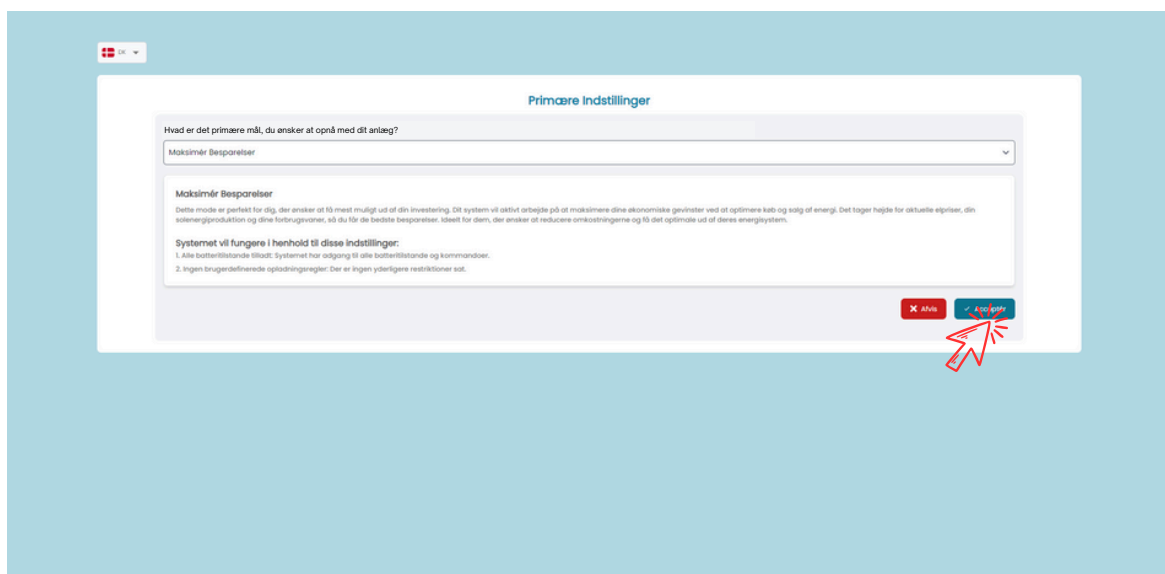

Find the serial number of the inverter on the information label, located on the side of your inverter, just around the barcode.

## ACCOUNT ACTIVATION

### Step 7: Choose your primary settings

Select the primary goal you wish to achieve with your system and confirm by pressing 'Accept.'

You can always change your selection later or fine-tune your settings further in your account.

# IntelliCharge.AI

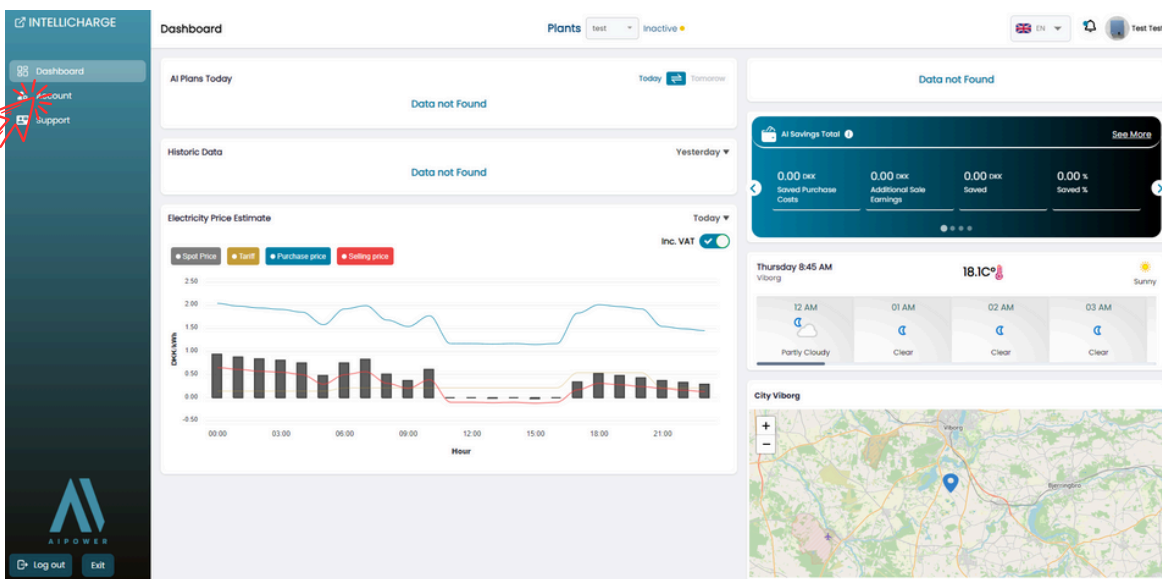

Congratulations - your account is now activated!

If you skipped 'Redeem Product Key' in step 3, you can do this under account settings by following the guide from steps 8-12. If not, you can proceed to step 13 to see what happens before we begin managing the solar system.

## PRODUCT KEY ACTIVATION

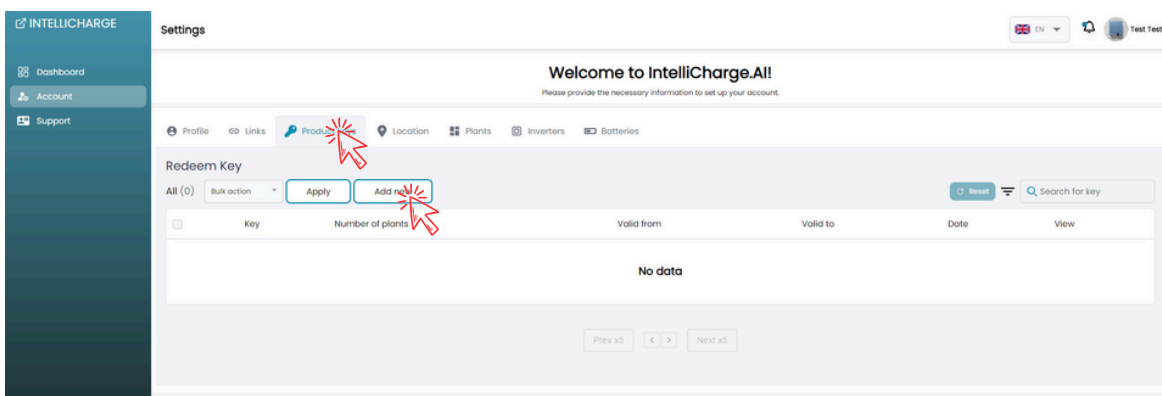

Step 8: Go to 'Account' section

## PRODUCT KEY ACTIVATION

Step 9: Activate the product key in the 'Product keys' section

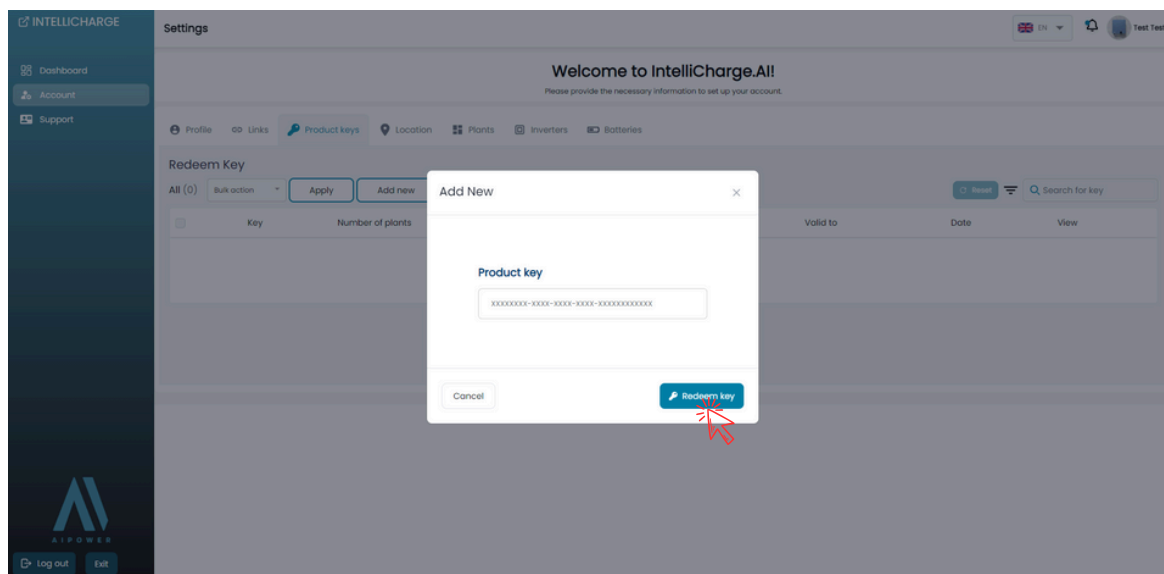

In Account Settings, you can activate product keys among other things. First, click on 'Product keys', and then on 'Add New.'

## PRODUCT KEY ACTIVATION

### Step 10: Enter the product key

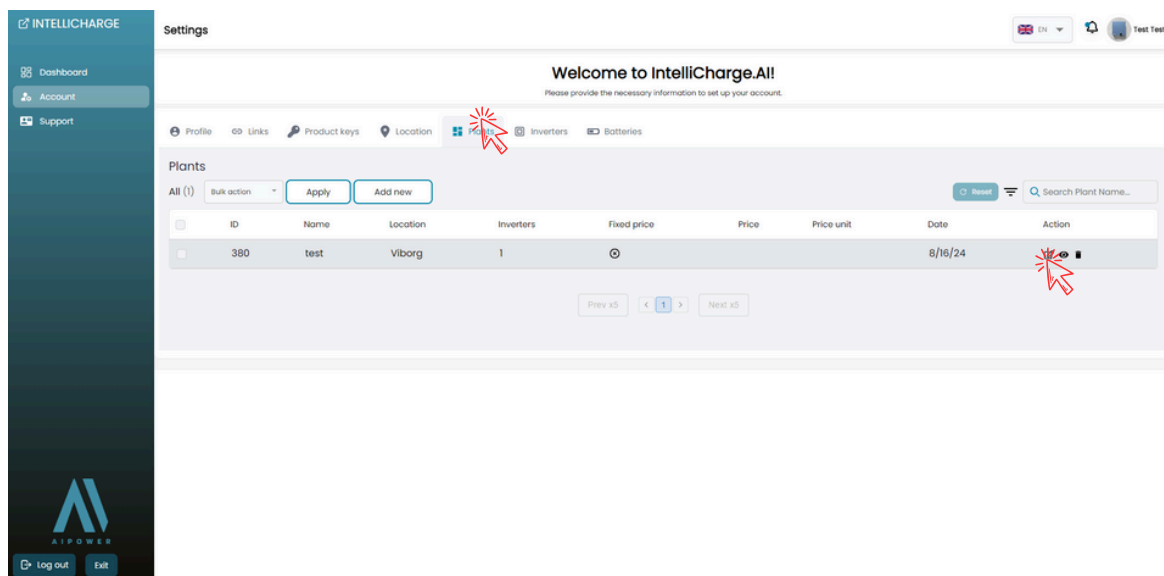

Now insert the product key and press 'Redeem Key.'

## PRODUCT KEY ACTIVATION

### Trin 11: Edit plant

Go to 'Plants' and press 'Edit' under 'Action.'

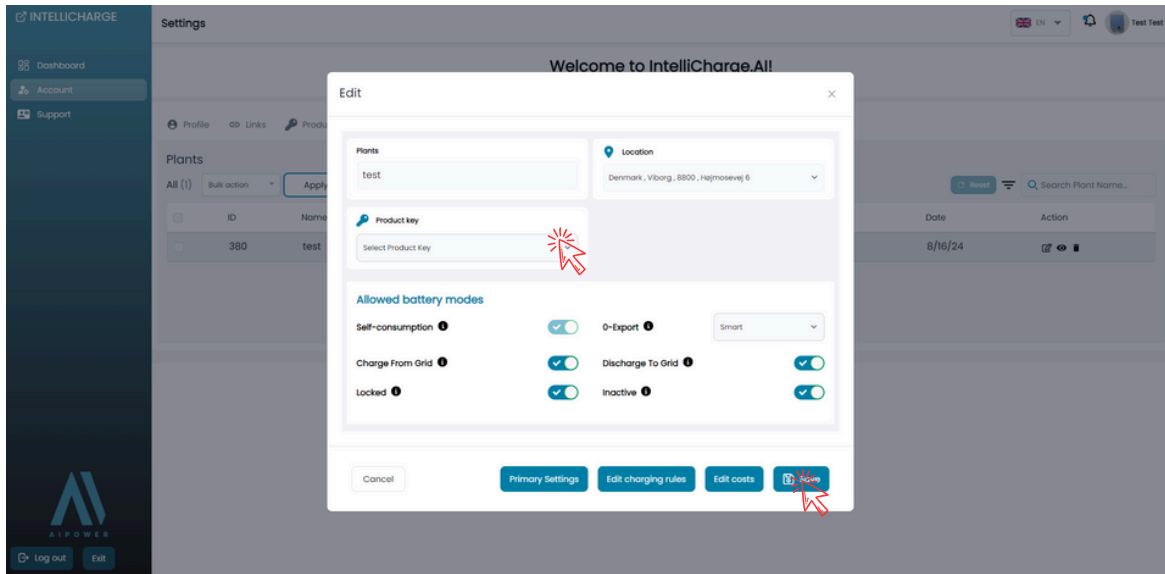

For further information, visit our website or contact us

## PRODUCT KEY ACTIVATION

### Step 12: Add product key to the system

Select your product key from the dropdown menu and confirm by pressing 'Save.'

**The product key is now activated!**

## ACTIVATION OF SOLAR PANEL SYSTEM

### Step 13: IntelliCharge.AI requests access to the solar system

We will contact the distributor or you to request access to the system.

This step is essential for us to start analysing your data and optimising your energy consumption. Please note that it may take up to a week after your account is activated before we can manage charging plans.

Until we establish the connection, you will only see estimates for electricity prices with tariffs on the dashboard on the home screen.

If you do not see any information on the price graph, we may need you to manually adjust tariffs. Should you need help, review our library of guides or contact us via email.

For further information, visit our website or contact us

## ACTIVATION OF SOLAR PANEL SYSTEM

### Step 14: Connection to the system established

Once we establish a connection to the system, our system begins collecting and analysing historical data on battery charging, household energy consumption, and solar energy production data.

As soon as this occurs, you will be able to view historical data on the control panel website. However, it may still take a day or two before we begin managing the system

## ACTIVATION OF SOLAR PANEL SYSTEM

### Step 15: AI takes over

When our system has had sufficient time to understand the plants's needs, it will start generating AI plans using historical data along with price and weather forecasts.

Our system continues to learn and improve its decisions as it gathers more data. This means that you may experience some instances of non-ideal behavior in the first few days.

We are always here to support you and answer your questions. Feel free to contact us at [info@intellicharge.ai](mailto:info@intellicharge.ai) if you cannot find answers to your questions on our FAQ page

**We look forward to assisting you in achieving savings on your energy costs.**
